

DX LISTENING DIGEST 00-07, January 18, 2000  
EDITED BY GLENN HAUSER

{Items from DXLD may be reproduced and re-reproduced only providing full credit be maintained at all stages}

\*\* ALASKA. 7365; Is all well at KNLS? This station always provides perfect reception here in the Pacific Northwest, but at 1317 heard with a very feeble signal in English with a religious program. Sure didn't sound like 100 kW, even considering propagation. (Volodya Salmaniw, 15 January, Victoria BC, DX LISTENING DIGEST)

Well, at 1340 check Jan 18, 7365 had its usual fair to good level here (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* CANADA. This is CTV. You will not be funny  
<http://www.nationalpost.com/network.asp?f=000118/180108> From the National Post today (via Ivan Grishin, Jan 18, DX LISTENING DIGEST)

\*\* COSTA RICA. I often wonder whether RFPI's 15049 is really on the air until 0600 as scheduled; UT Jan 18 finally faded out around 0430, tho it had been fading down for quite some time before. We long for a lowpower 7 or 9 MHz SSB channel as backup when 6975 fails. Joe Bernard reports that its antenna had some more problems with wind; James Latham and crew were working on fixing it Monday but still not back on UT Tuesday. When 6975 is back, 15049's extended schedule before 2100 will probably cease (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* IRAQ/CZECH REPUBLIC. The following item appeared on Radio Prague's English news, January 17:

Iraq is reportedly refusing to sign trade deals with the Czech Republic in protest at broadcasts to the country by Radio Free Europe, which is based in Prague. The AFP news agency said an official Czech delegation left Iraq empty-handed on Sunday after two weeks of fruitless negotiations. One member of the delegation was quoted by the ITAR-TASS news agency as saying that Iraq was refusing to sign a single contract as long as Radio Free Europe, which is funded by the US government, continued to operate from the Czech Republic. The delegation had hoped to sign contracts with Iraq under the "oil for food" programme.

(Roger Tidy, England, Jan 17, DX LISTENING DIGEST)

Gee, why doesn't Iraq penalize Germany, Greece, and UKOGBANI, transmitter site countries for this, or is that concept too sophisticated for Saddam? Here is the R. Free Iraq schedule, actually

considered a R. Liberty service, posted as of Jan 18, all effective Oct 31 to March 25, in Arabic; number after site abbr is the transmitter number at the site.

\*\* MONGOLIA. 9720 at 2000 had EE but not // 12085.3 (sounded similar but went off 2010, - not sure who this is - wasn't English) 12015 has no trace of even a carrier. I will check earlier times when I can (Don Moman, Alberta, Jan 17, hard-core-dx via DX LISTENING DIGEST)

Your station on 12085 was probably Syria which also occupies that freq.; they usually start their various language programming at 5 to 10 minutes after the hour.

As one who listens (or tries to) to Mongolia on a regular basis, I usually can't get them at all between early November and late February due to propagation-usually the best times to get their broadcasts in the 1000-1300 time frame here in New England is early March and early October. I \*will\* check them in the morning hours here and let you know what I can hear. (Craig Seufert, Meredith, NH USA, Drake R8B, AlphaDelta Sloper, hard-core-dx via DX LISTENING DIGEST)

Don, I think I sorted this one out. Last Saturday I was listening around the same time. No Monglolia, but good enough audio to say this was Arabic, and most likely Damascus, Syria. The times and frequency coincide. (Walt Salmaniw, BC, hard-core-dx via DX LISTENING DIGEST)

Hi Glenn: While in the Adirondacks in November noted that the Voice of Mongolia had changed its frequency for English language broadcasts

at 12:00 from 12.015 back to 12.085. The signal was not as good and there was more interference. I understand that they also use 9.720 for their afternoon broadcasts to Europe. I live in New York City and don't stand a chance of hearing them here and I don't know when I'll get a chance to get out of town and try them again. Their website is worthless. They have been claiming to have real audio coming soon for the last year or so, though do not another broadcaster from Ulan Bator broadcasting on the web in Mongolian. Thank you for your excellent columns and follow them daily. Best Regards, (Tom Sliva, NYC, Jan 17, DX LISTENING DIGEST)

Thanks for everybody's input on this, but more is needed. Better get VOM while you can; a few weeks ago columnist Jack Anderson predicted that in a few years China would take over Mongolia since it is 1) easy pickings, no longer under protection of the Soviet sphere; and 2) in retribution for previous Mongolian control of China; and also Myanmar to give China an outlet to the Indian Ocean (Glenn Hauser, DX LISTENING DIGEST)

\*\* SWEDEN. RADIO SWEDEN - Saturday January 15 saw the addition of a new language to the Radio Sweden family, Waberi Radio, our new service in Somali. But you're not going to be able to hear it on any of our shortwave or satellite relays. Swedish Radio's Immigrant Languages Department has merged with Radio Sweden, so besides our six international languages: English, Swedish, German, Russian, Estonian, and Latvian, we also are responsible for programming in nine other languages, broadcast domestically for immigrants in this country. These change as the international situation changes, and January 10th saw the end of broadcasts here in Greek, and the addition of Somali. The programs are on the air once a week on our own P6 FM transmitter here in Stockholm, and around the country on the FM P2 network, and as part of the DAB Digital Radio stream. And of course, like all 15 Radio Sweden languages, Waberi Radio is available on the Internet in RealAudio: <http://www.sr.se/rs/min/sounds/somali.ram>

Webcasting has added a whole new dimension for us. For example, although Radio Sweden's own programs in Spanish were cancelled some years ago, we've suddenly discovered that we have an audience abroad for the Immigrant programs intended for Latin Americans living here. And during the Kosovo war, we had a considerable foreign audience for our Immigrant programs in Albanian. You can find broadcasts in all 15 Radio Sweden languages at: <http://www.sr.se/rs/listen> (SCDX/MediaScan Jan 18 via DX LISTENING DIGEST)

\*\* U K O G B A N I. I believe I mentioned this briefly in December, but should make a bigger point of a current BBC WS series, Essential Guide to the XXI Century. This has a new half-hour programme five days a week through February, with a different subject each week, so

there is considerable depth. This week: Family, Sex and Society, specifically: Tue, Meeting and Mating; Wed, Sex and Procreation; Thu, Gender-roles and Identity; Fri, The Family.

AE stream times are M-F 1830 (on 17840), Tue-Sat 0230 (12095, 6175, 6135, 5975); Af M-F 1930; As M-F 1130-E, 1530-S.

Upcoming weeks' topics: Jan 24, Habitation; Jan 31, Work, Leisure and Lifestyle... Info from BBC On Air via Chris Hambly (Glenn Hauser, DX LISTENING DIGEST)

\*\* U S A. Larry King is hard to find on the radio any more, tho his live hour on CNN TV UT Tue-Sat 0200-0300 is supposed to be on Westwood One, but I have found him now on WMAQ 670 Chicago during the repeat at 0500-0600. Seems to forget his radio roots, or that he is still on radio as he says ``Here you see...`` somebody's book (Glenn Hauser, OK, DX LISTENING DIGEST)

\*\* U S A. [Re: WPTF SW show Monday night, DXLD 00-06] I was able to catch parts of the show here in Tampa, a bit of a challenge since we have a local on 680. Hrd call-in from a lady, discuss apartment based listening, BBC freqs, mention of Larry Magne's PWBR publication, was best around 2220-2230 EST here. What I hrd (signal was not there all the time due fading and shifting tight null on WRMD) sounded like a nice general interest show, not overly technical. I'll bet this format could work in a lot of markets, hopefully more often than once every 8 weeks. (Bob Foxworth, Tampa FL, NRC-AM via DX LISTENING DIGEST)

\*\* U S A. [Re: KLIF upcoming call change, DXLD 00-06] I thought US stations had to give call letter ID on the hour. I haven't heard them once this morning (!) other than "The Big 570." Isn't that a big no-no? 73 de (Bill Smith, W5USM, Jan 17, DX LISTENING DIGEST)

\*\* VENEZUELA. Thais Silva de White (Mrs. Jeff White of WRMI) laments that Venezuelans abroad have little SW contact with the homeland, in the wake of the tremendous flooding and mudslide tragedy which killed and made thousands homeless. Since Radio Nacional de Venezuela cannot be heard outside the country, she proposes that her application for a Radio San Juan Internacional finally be granted a SW construction permit, to operate from San Juan de los Cayos in Falcon State (Letter to La Razon, Jan 6, via Banda Tropical, Club Diexistas de la Amistad, translated and summarized by Hauser, DX LISTENING DIGEST)

Glenn -- Everything you said is correct. I can add that a 60-meter band frequency was authorized to the station about a year and a half ago; only the construction permit is needed now. It will be a relatively low-powered station. There is absolutely no connection

whatsoever with Radio Miami International. The Club Diexistas de la Amistad (of which Thais and I are members) has been asked for its assistance with certain aspects of the project, and has been offered airtime for DX programs and other types of collaboration. Beyond that, Thais really doesn't want to go into many details at the moment, as the process with the government bureaucracy is at a rather delicate stage right now. Things move slowly down there. If and when something happens, you'll hear it from us or the CDXA. All the best.  
(Jeff White, FL, DX LISTENING DIGEST)      ####
